Katha 01 · Chanakya ratha

Dieline set. Every page after this one is drawn at 1:1 in millimetres.

Front view · 1:2 · ready to display

Base 320 × 200 × 90 · canopy 130 × 66, 282 tall · total height about 37 cm

How it goes together · no glue, no scissors

1. **Tear the band**
   Lift off the folded canopy, window and phone-stand sheet.
2. **Pull a wheel**
   Each wheel is a drawer. Drawer 1: skeleton + stencils. Drawer 2: clay + cloth.
3. **Build Chanakya**
   Follow the manual. Stand him on the plinth, pegs up into the foot loops.
4. **Pop the canopy**
   Open the flat tube, curve the roof band, tuck its tab into the slit.
5. **Lock it on**
   Fold the inner frame up, side tabs into the slits. Push the 4 floor tabs into the stage.
6. **Shoot, then keep**
   Slide the window out to film. Slide it back in: the ratha is his display case.

Pages

2 · Base tube (stage on top, symbol legend on the back)
3 · Drawers ×2
4 · Wheels, plinth, window
5 · Canopy outside
6 · Canopy inside (backdrop)
7 · Retail band
8 · Phone stand

Not cut or tested yet. Check on the first prototype: slot fit for the real board, roof-band curve, drawer slide, and that the clothed puppet clears the arch.

1 · Overview

2 · Base tube · 320 × 200 × 90 · 400 gsm board, factory glued

Katha 01 · Chanakya ratha · 1:1 · mm · cut red · fold green dashed · glue blue

Build him. Shoot him. Keep him.

STAGE · push the pegs up through any two holes

The ratha canopy stands here

TOP

Ends stay open:
a drawer slides in
from each side.

What the symbols mean

Every pattern on this ratha comes from Chanakya's Mauryan world.

Lotus
Grows clean out of muddy water. Mauryan pillars rise from a lotus bell.

Chaitya arch
The horseshoe doorway of Lomas Rishi cave, carved in Mauryan times.

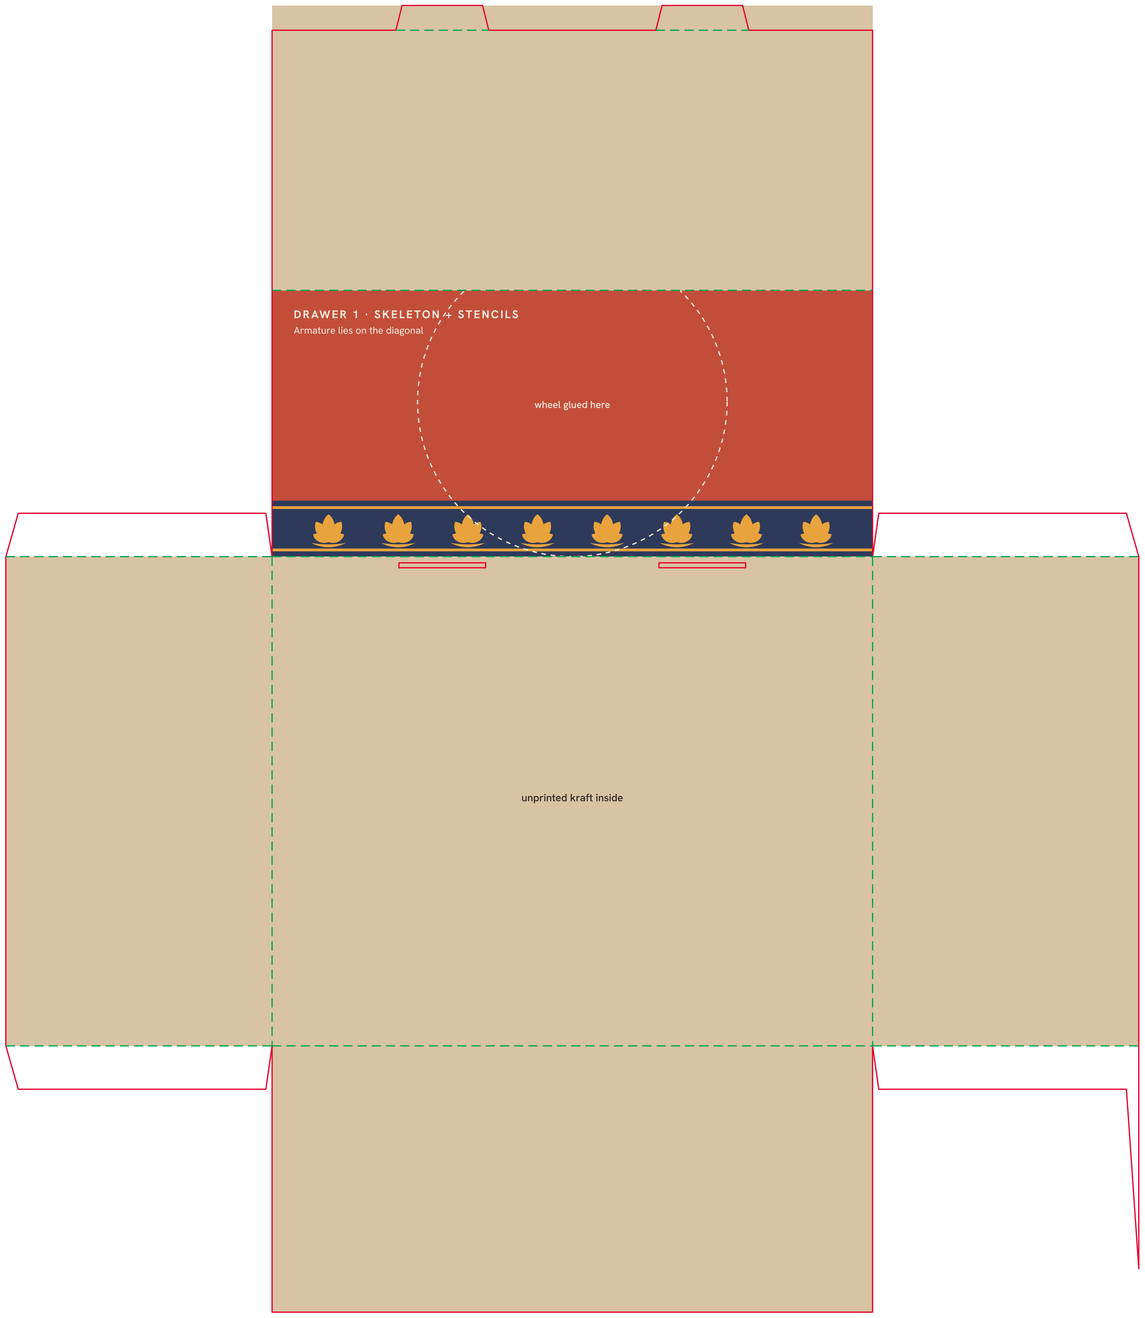

Chariot wheel
Arthashastra: one wheel alone does not turn. Even a king needs helpers.

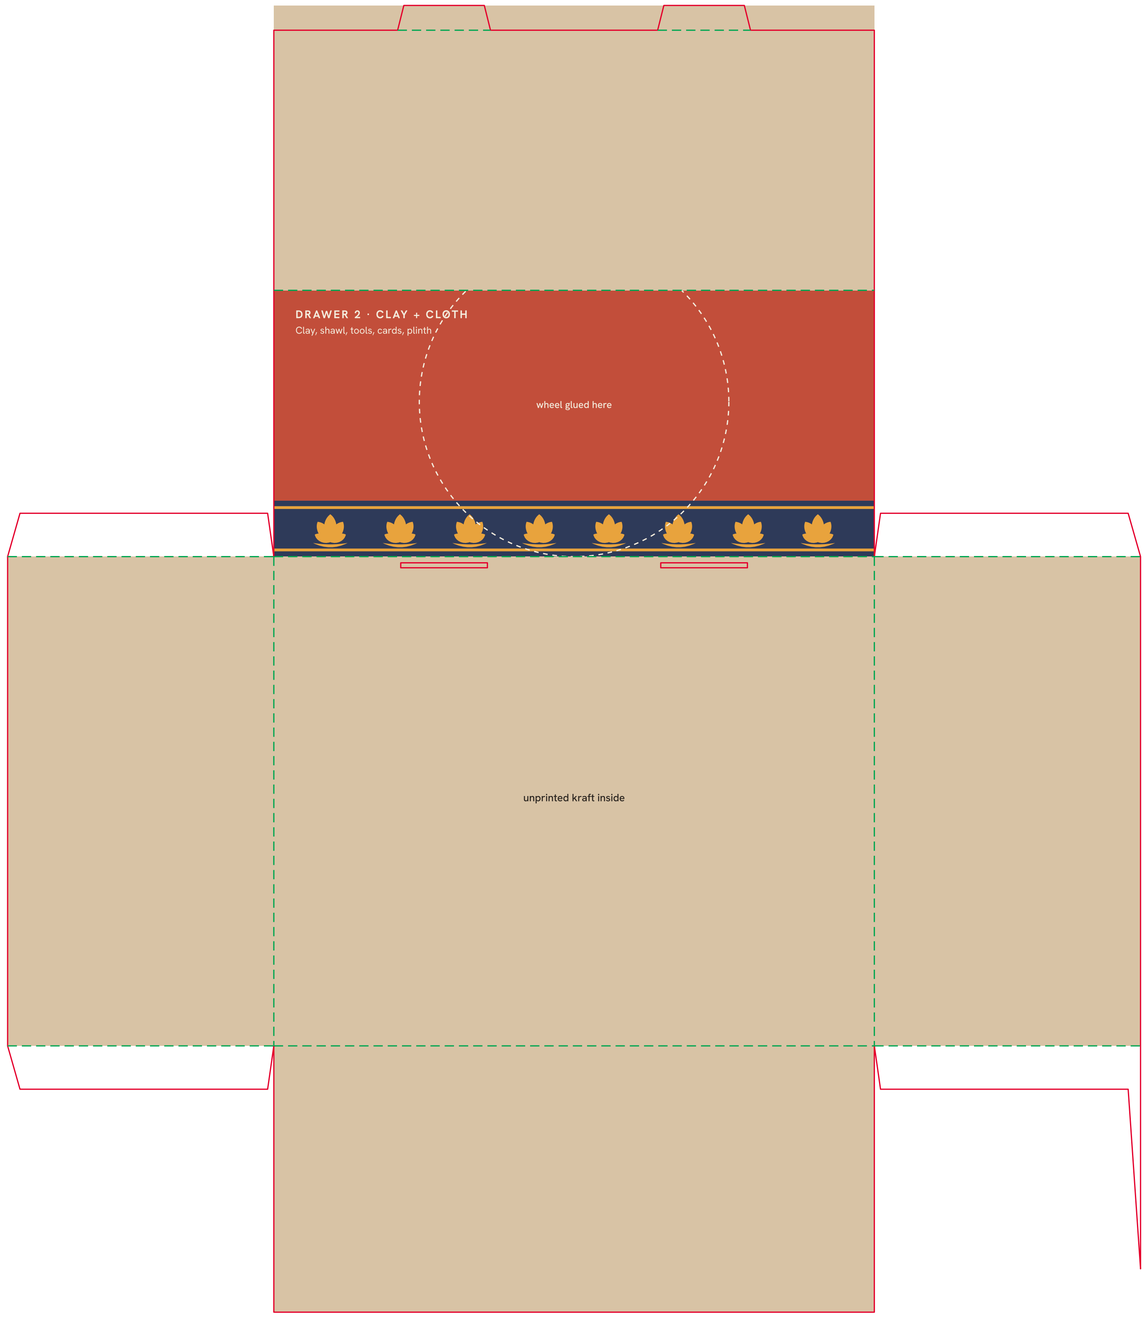

Punch-marked coin
Mauryan silver money, stamped with signs like the sun.

Palm-leaf book
The Arthashastra survived on palm leaves and was found again in 1905.

Polished pillar
Mauryan stone was polished until it shone like glass.

BACK

3 · Drawers ×2 · 194 × 158 × 86 · 400 gsm board, factory glued

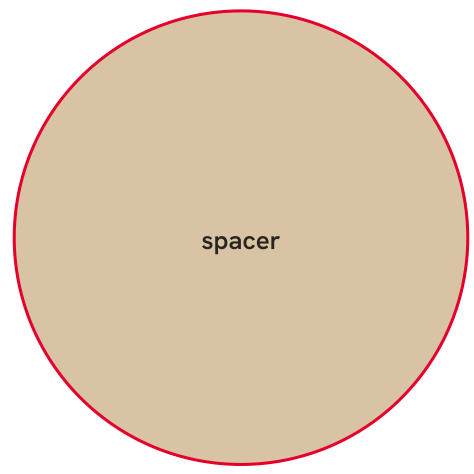

Katha 01 · Chanakya ratha · 1:1 · mm · cut red · fold green dashed · glue blue

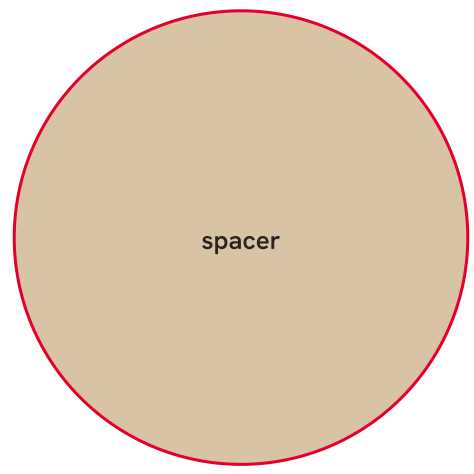

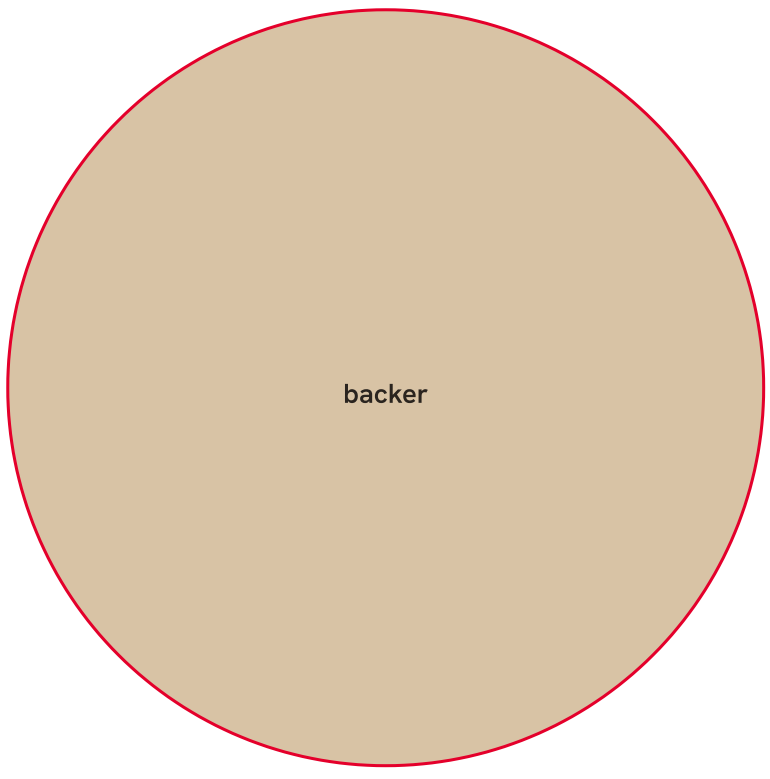

wheel face

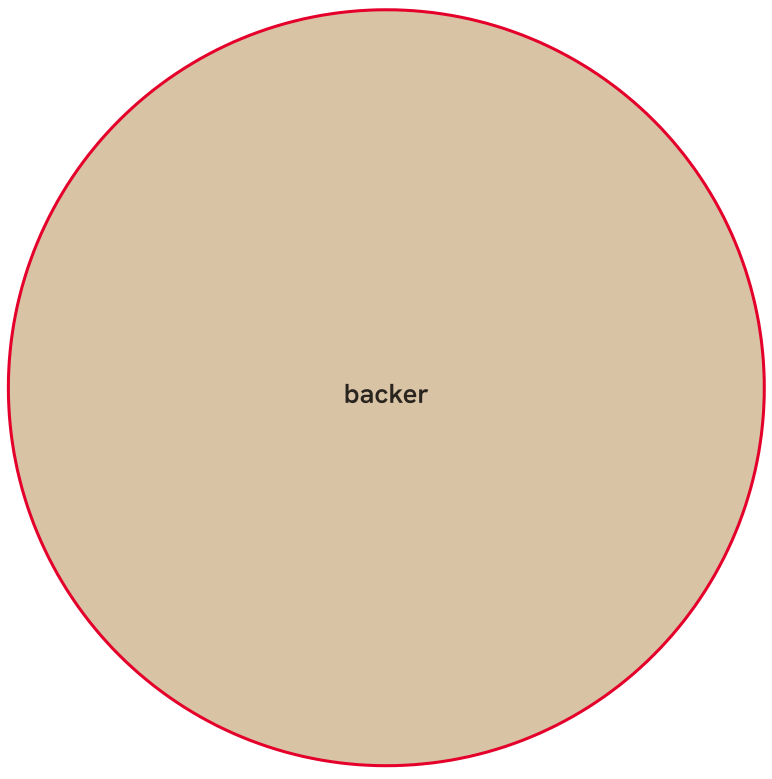

wheel face

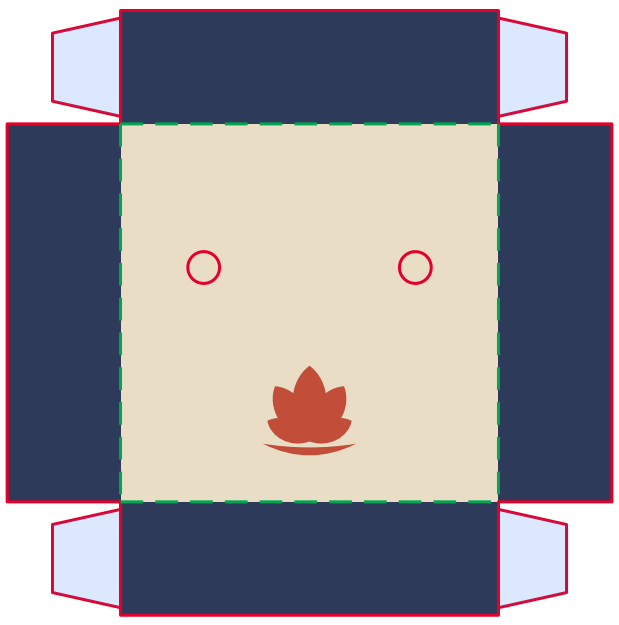

Each wheel: face + backer + 2 spacers, 1.5 mm greyboard, glued.
The spacers lift the rim 3 mm off the drawer, so small fingers can pull it.

Plinth 50 × 50 × 15
pegs go up through the 2 holes

Clear window
110 × 230 · 0.5 mm PET
slides out for filming

4 · Wheels, plinth and window

ROOF BAND

Chanakya

Who was Chanakya?

Chanakya was not a king, and not a warrior. With his brain he built an empire.

Over 2,300 years ago this teacher wrote the Arthashastra, a book on how to run a kingdom.

He helped young Chandragupta take the throne and start the Mauryan empire.

"One wheel alone does not turn."

Arthashastra 1.7

BACK

SIDE

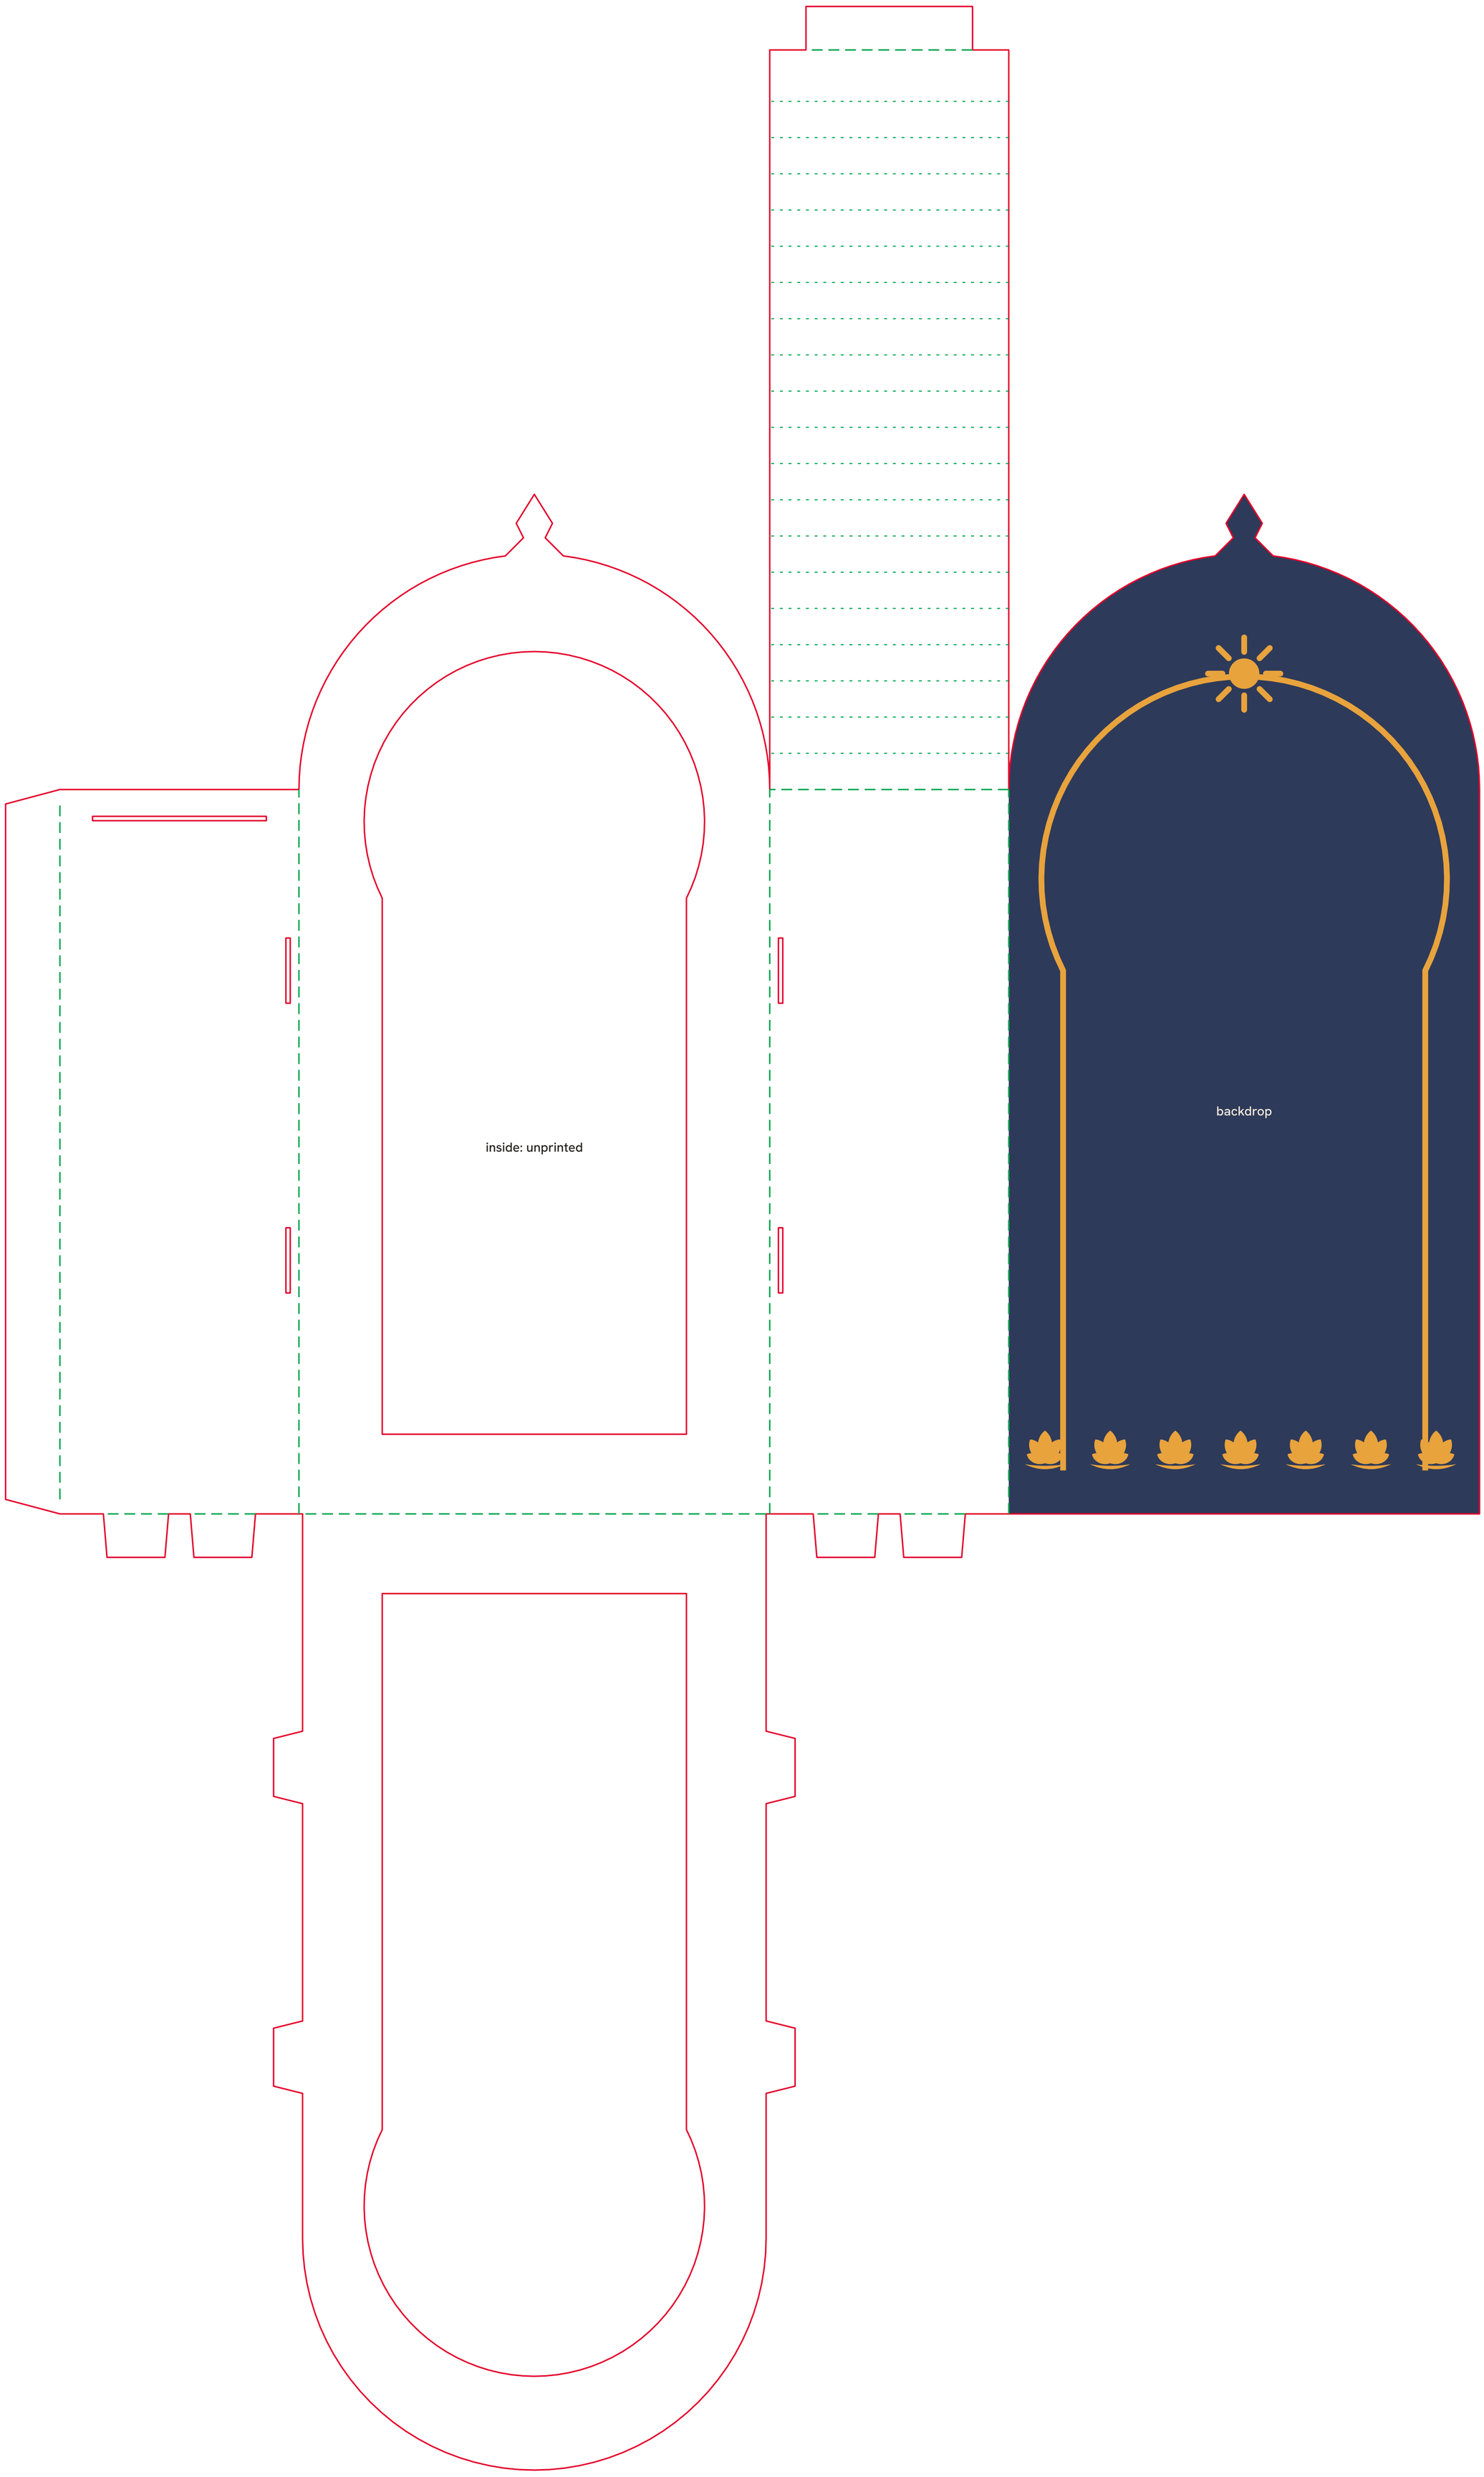

FRONT

SIDE

inner frame · folds up behind the window

5 · Canopy · ships flat, child pops it open · 400 gsm

Katha 01 · Chanakya ratha · 1:1 · mm · cut red · fold green dashed · glue blue

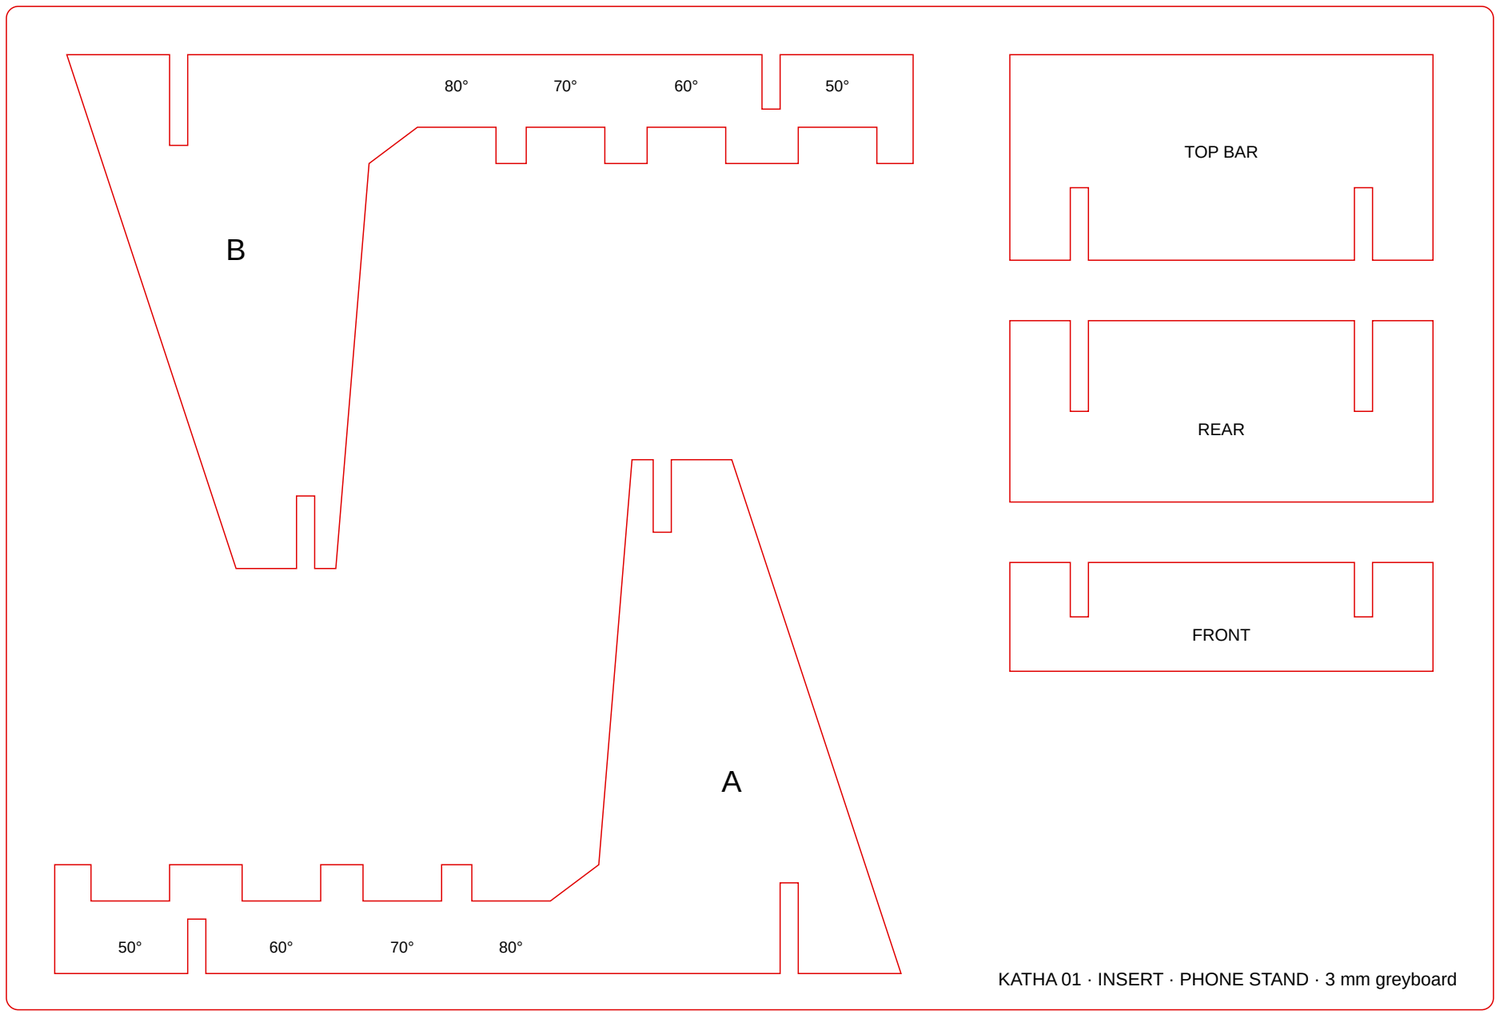

6 · Canopy · inside print (seen from the back of the sheet)

The band holds the folded canopy, window and phone stand on top of the base. Tear it off and keep the box.

7 · Retail band · 110 mm wide · 157 gsm art paper

Katha 01 · Chanakya ratha · 1:1 · mm · cut red · fold green dashed · glue blue

3 mm greyboard, laser cut. Ships under the folded canopy, on top of the base.

8 · Phone stand · punch-out, no glue

Katha 01 · Chanakya ratha · 1:1 · mm · cut red · fold green dashed · glue blue
