One box, three lives

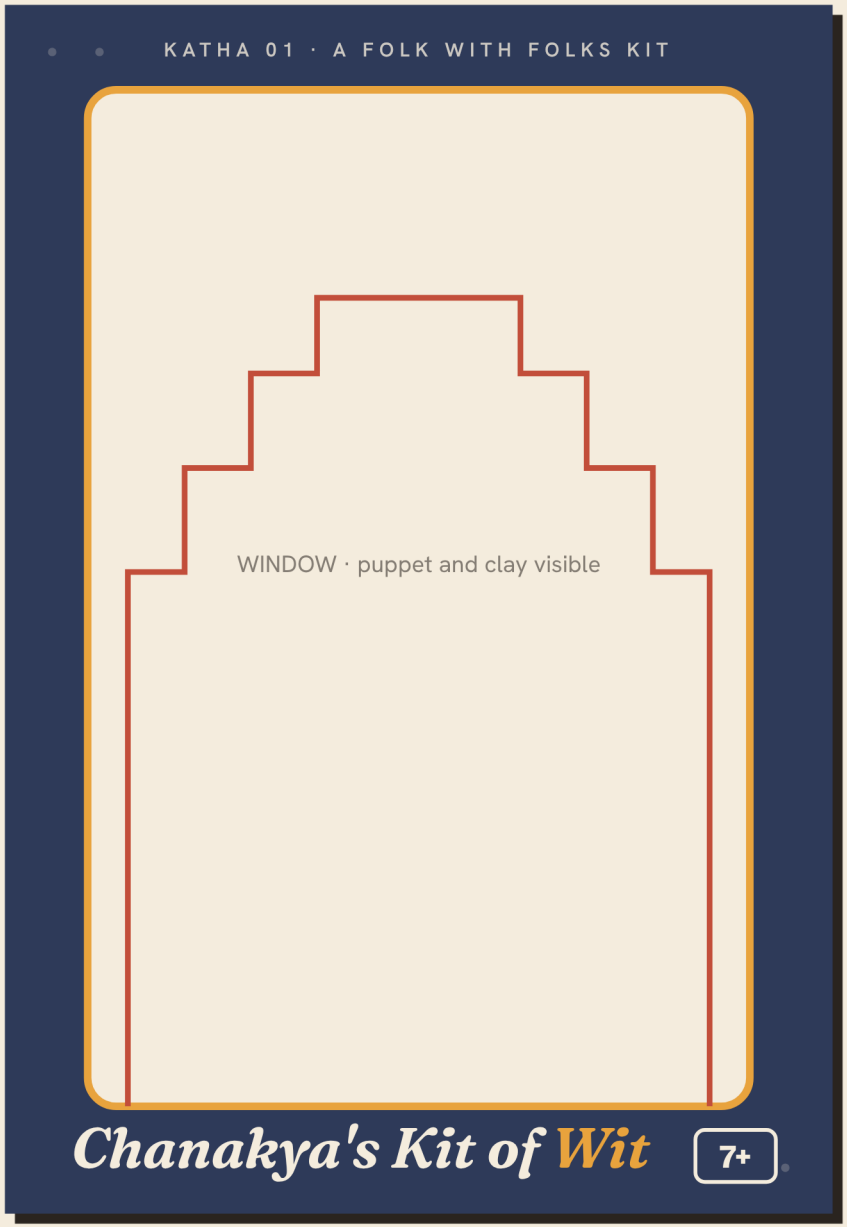

1 · Tray → Stage
Flip the tray. The peg floor and torana backdrop are printed for the shoot. Stays as the set.

2 · Insert → Phone stand
The card that holds the parts is the jigsaw stand. Punch out, slot, pick a notch: 80°, 70°, 60°, 50°.

3 · Sleeve → Display box
Stand the sleeve on end, slide in the clear window. The finished puppet lives on the shelf.

Sleeve · front

175 × 256 MM FACE · WINDOW 140 × 215

Rules

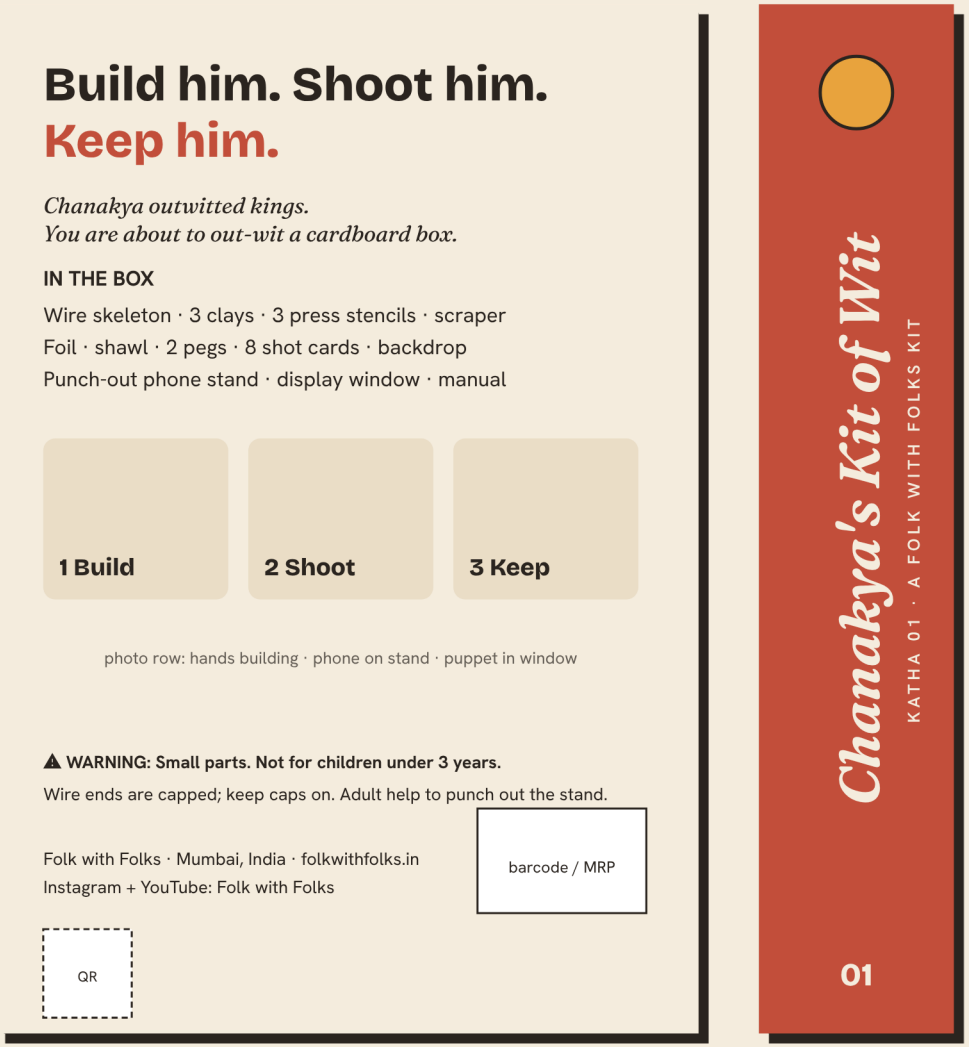

- Indigo sleeve. The window is the hero: the real armature and clay are the picture.
- Katha logotype in Fraunces italic, paper colour; "Wit" in marigold.
- Endorsement "a folk with folks kit" in Hanken 600, tracked caps, top edge.
- One torana arch, terracotta line, framing the window. No other motifs on the front.
- Age 7+ in a ruled box, bottom right. Same corner on every Katha kit.

Finish

- Matte, uncoated feel. Optional blind emboss on the torana line.
- Window: die-cut; 155 × 230 mm clear acrylic or PET behind it, which becomes the display front.

Sleeve · back and sides

BACK 175 × 256 · SIDES 48.5 × 256

Back

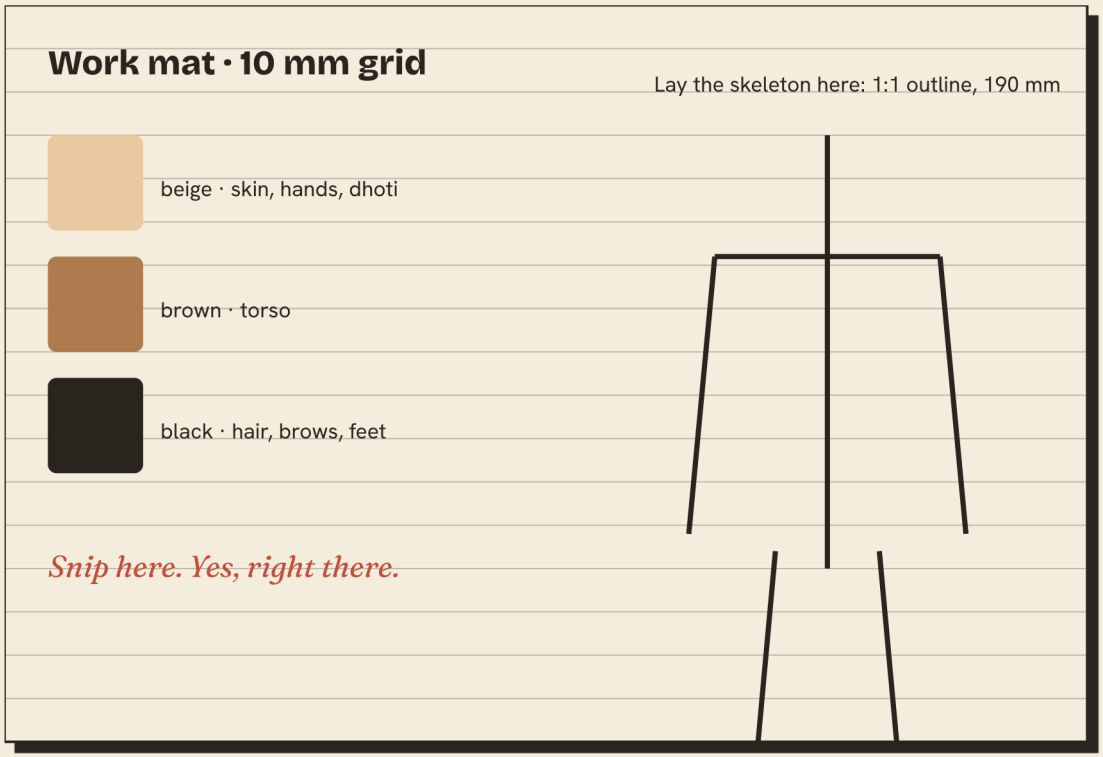

- Paper ground. Headline in Bricolage 800, two lines, the second in terracotta.
- The 1 · 2 · 3 photo row tells the "three lives" story without words.
- Legal block bottom-left. The ⚠ glyph is the only symbol allowed.

Spine (shelf face)

- Terracotta for Chanakya, marigold for Tenali, neem for Birbal. A shelf of kits reads as a colour row.
- Kit number at the bottom, character sun badge at the top.

Before print: check legal text with the printer (MRP, manufacturer address, toy-safety marking for India such as BIS / IS 9873 where it applies).

Inside prints

Tray inside = work mat

Replaces the separate work mat. Grid, colour key, and a 1:1 skeleton outline so kids can check proportions.

Tray outside = stage floor

Plain paper deep with the 45 peg holes (4.2 mm) and a faint floorboard line. Nothing busy behind the puppet.

Insert

Unprinted 3 mm greyboard; piece letters laser-etched. Raw board reads as "workshop", and keeps cost down.

Backdrop

Indigo with one marigold stepped torana. Folds at 85 mm to store.

Print and material spec

FOR VENDOR QUOTES

Colour

Token	Hex	Use on the box
Indigo	#2E3A59	Sleeve, backdrop
Paper	#F4ECDD	Back, window frame, type on indigo
Terracotta	#C24E3A	Chanakya spine, torana line
Marigold	#E8A33D	"Wit", badge, backdrop arch
Ink	#2A241F	Text, line art

CMYK values are not set yet. Ask the printer for a proof on the real board (FOGRA39 for coated, uncoated profile for kraft-feel stock) and log the values in brand-core/tokens.css.

Type

- Fraunces italic 600–700: Katha logotype and story lines only.
- Bricolage Grotesque 800: headlines, numbers.
- Hanken Grotesk 400–700: everything else. Minimum 6 pt on the box.

Materials

Part	Material
Sleeve	1.5 mm board wrapped in 157 gsm matte art paper, or 400 gsm FBB for prototype
Tray	1.5 mm board, printed both sides
Insert / stand	3 mm greyboard, laser cut + etched
Backdrop	300–350 gsm card
Window	0.5–1 mm clear PET or acrylic, 155 × 230
Stencils	3 mm acrylic or PP, laser cut; base plate with 1 mm ridges
Manual	A6, 12 pp, 130 gsm matte, saddle stitched
Clay	Oil-based plasticine, non-toxic, 3 colours
Armature	About 2 mm aluminium wire, pre-twisted, capped ends

Cut files for every part are in **katha/assets/kit/**. Prototype first; none of this has been cut yet.
